

Subject Information for Parents

Department: Maths

Year: 11

What topics are covered during the year?

In year 11 pupils have access to topics from all attainment targets; Number, Algebra, Shape and Space and Data Handling.

What key assessments will take place?

Some of Year 11 sit the November GCSE Mathematics examination and have the option to give up Mathematics in January if they have achieved their baseline target including a C or above. Pupils who do not sit the November examination must sit the Mock GCSE examination in December. Pupils then sit the June GCSE Mathematics examination if they have continued with mathematics after the January results.

How can parents help their child's learning?

Parents can help pupils with homework, and take an interest in www.Mymaths.co.uk. This is an excellent resource that gives pupils access to all topics that are tested. The work is broken down by level so pupils can easily identify the work that is relevant to them.

Are there any trips, visits or special equipment needed?

Pupils need to come fully equipped to lessons with a pen, pencil, ruler, rubber, protractor, pair of compasses and a calculator (preferably a scientific one to last through the whole of school).

There are no trips currently organised.
