

GCSE Graphics Exam Preparation

Your Graphics exam will consist of one paper which will last 1 hour 30 minutes.

The paper will be marked out of **80 marks** and contain two **6 mark questions** where you will be assessed on the quality of your **written communication** (Spelling, punctuation and grammar) as well as the content of your answer.

The examination is a combined paper covering topics **on Sustainable Design and Technical Aspects of Designing and Making**. This pack contains papers which are split into the above two sections but your exam will be combined.

Below is the programme of study which we will be using to prepare for the examination in class and at home. When working on the exam questions always try to answer all sections then check your responses against the mark schemes.

The purchase of a revision guide available from your teacher is an essential part of your exam preparation and will be used in class as well as at home.

<u>Topic in Lessons</u>	<u>CGP Revision Guide Reference</u>
<i>Properties of Graphic Materials</i>	<i>Pg 22-23</i>
